## ORTODOUX. HANDCRAFTED BOOT

We made our boots with serious craftsmanship and traditional techniques of our local craftsmen. Every boot handled by 4-7 experienced people. We do care about our works and we love to do all the shit. Therefore something you have to know about the boots. We gave you this booklet just in case if you are new to leather boots. But if you're expert enough, you can throw this back to the box and enjoying those badboys right now.

## ORTODOUX IS MORE FASHION TO WORK BOOTS

- Please do not wearing our boots as safety boots because we don't have steel toe for covering your feet. You can use it for hard work but with your consideration.
- The neat details won't stay clean without your help. So hands on and treat your boots whenever you had a time.

## LEATHER TYPE

- **Brushed Off** *Daedalus, BloodRain, Lestat, Captoe Maroon, Penny Loafer*

- Naildown (7/10)
- Norwegian Stitch (8/10)
- Storm Welted (8/10)
- Goodyear Welted (9/10)
- Veldtschoen (9/10)

## LEATHER CARE

### • Cleaning

Clean your footwear after use. For general cleaning use a clean soft cloth, damp cloth and soft bristle brush.

For Patent leather Use damp (not wet) soft cloth to wipe dust or debris. You can use Patent Leather Cleaner product, apply with soft cloth or chamois, allow to dry then buff with soft cloth to shine. Or simply follow recommended application

Suede, Nubuck and Roughout leather you can clean your footwear using suede brush or a rubber suede cleaner

### • Conditioning

Most of our leather shoes can use shoe cream (neutral color) or Leather conditioner for conditioning

For Crazy Horse and Pullup leather use leather conditioner. Suede, nubuck and roughout leather doesn't need oil or polish, some suede leather care product offering spray to clean, conditioning and protect in one package

### • Glazing

You can use several products and they're on the market. We suggest *Saphir* for an awesome glossy

- **Mink Oil, Obenauf and Beeswax.** You can googling about those great product, the reason and results. Don't forget to check saddle soap, suede shampoo. We're not explain about it here because we won't make a thicker booklet.
- **Wet users.** If you want to use your boots under the rain, to snowy walks, etc. please remind to dry it up soon after that. You can use a cloth, newspaper or whatever but not heat blower (oh, are you out of your mind?) At least do it with your consiusness.
- **Weatherproof.** You can use this product at rainy days or snow.

## LEATHER TAG

Every purchase of our product will get a leather tag which is the very same material and treatment with your goods.

The function is you can try whatever you want to the leather tag. You can try to burn (off course for a burn-test to show the genuine leather character), applying leather products or scratching, stretching, you mean it. So please don't hesitate to ruin your tag as bad you want unless you want to keep it other way.

All of our products using Genuine Leather but if you want to know more about Genuine Leather Test simply search it on the internet.

## SOLE MATERIALS

We choose various materials for our products. It's for the look and yes, our designers ask for it.

- Leather Sole. Astonishing look, slippery on carpet
- Rubber Sole. Good traction, waterproof, heavy, hard
- Microtech+. Lightweight, ecofriendly, less traction
- TPR. Lightweight, high strength, less flexibility

## SOLE REPLACEMENT

- The sole however can be thinner time to time. You can replace the sole at your favorite cobbler using our sole or any other sole (like vibram's, dainite's, commando's or elses) as well. If you need our sole you can contact us by email to order and we will ship it directly to you.

## LEATHER SHOES AGAINST WATER AND SNOW ⚠

- Genuine leather not a best friend to water and snow. Doesn't mean you can not wear them at rainy and snowy day. You can wear it freely but they will need a treatment after that. For details you can read on the Leather Care point above.
- Weatherproof product is one best option. Apply before you wear it so they will be the a good coat of your leather goods.

## TIPS

- Store leather shoes using a shoe tree, alternatively, stuffed with newspaper, this will help retain the shape of the leather
- If using shoe care products, always read the instruction and test on inconspicuous spot for colorfastness, some treatment product may darken light-colored leather
- If your leather shoes or boots get wet, stuff with newspaper to maintain their shape and to soaksome moisture, let them dry air naturally with room temperature
